

New from ELSOLD:

Lead-Free Solder Paste in Jars with Yellow Lids.

ELSOLD is introducing with immediate effect yellow lids for its lead-free solder pastes in order to make it easier for customers to differentiate between lead-free pastes and standard SnPb pastes in the warehouse and in the production line. Other packaging methods, like cartridges, syringes, and Pro-flow® cassettes are being identified by the yellow ELSOLD lead-free Smiley. In future, ELSOLD will also provide equivalent identification for these packaging units.
